Objective

Passionate Junior Java Developer with a robust foundation in Object-Oriented Programming, data structures, and SQL. Skilled in developing clean, maintainable Java code and experienced with REST APIs, Spring Boot, and database operations. Eager to contribute to scalable backend systems and innovative enterprise-level Java applications.

Technical Skills

- **Languages:** Java, SQL, JavaScript (Basic)
- **Frameworks/Tools:** Spring Boot, Git, REST APIs
- **Databases:** MySQL, PostgreSQL
- **Concepts:** OOP, MVC Architecture, Exception Handling, Java Collections, File I/O

Professional Experience

- | | | |
|---|----------------------------------|--------------------|
| Software Engineer, Intern | <i>NexInit Pakistan, Karachi</i> | Jan 2025 – Present |
| <ul style="list-style-type: none">• Created Expense Manager App and learned fundamentals of Flutter• Developed and optimized REST APIs for internal business tools, improving module performance by 15%. | | |

Education

- | | | |
|---|---------------------------------------|---------------------|
| Bachelor of Software Engineering | <i>Bahria University, Karachi</i> | Jul 2020 – Jul 2024 |
| Intermediate in Pre-Engineering | <i>Bahria College Karsaz, Karachi</i> | Aug 2018 – Aug 2020 |

Projects

- | | |
|--|---------------------------|
| Electronic Voting System | <i>Final Year Project</i> |
| <ul style="list-style-type: none">• Engineered a secure voting system integrating blockchain and biometric authentication for enhanced security.• Implemented REST APIs and backend logic using Java and Spring Boot, ensuring scalable architecture.• Developed smart contracts in Solidity, enabling transparent and tamper-proof vote processing. | |
| Inventory Management CLI Application | <i>Personal Project</i> |
| <ul style="list-style-type: none">• Built a Java-based inventory system with CRUD operations for efficient product management.• Utilized text file storage, showcasing expertise in OOP, Java Collections, and exception handling.• Designed modular code structure, improving maintainability and extensibility. | |
